

2024 SPECIES DESCRIPTION & SITE SUITABILITY

			D	ECIDUOUS HARDWOODS			
PICTURE	SPECIES	SCIENTIFIC NAME	MATURE HEIGHT	DESCRIPTION	SOILS	LIGHT	USES
				*dense foliage *white flowers	*widely adaptable	*full sun	*wildlife food
14 1-4	BLACK CHERRY	Prunus serotina	75'	*fruit for birds & small animals	*well drained	*part shade	*shade
To dilette				*resistant to walnut toxicity	Well didnied	paresmade	*timber
	NORTHERN	Quercus rubra	75'	*fast growing *tolerates air pollution *shade tolerant *food for birds & animals	*widely adaptable	*full sun	*wildlife food *shade
	RED OAK	Quercus rubru	/5	*golden-orange/crimson/russet color in fall	*well drained	Tuli Suli	*timber
Ø				*good for stream banks	*	** 11	timber
4	RIVER BIRCH	Betula nigra	70'	*fast growing *yellow in fall	*widely adaptable	*full sun	*shade
				*tolerates standing water	*poorly drained	*part shade	
4				*prefers well drained soil		*full sun	*timber
2	SUGAR MAPLE	Acer saccharum	75'	*shade tree *valuable timber	*well drained	*part shade	*shade
1				*yellow/orange/red in fall		paresmade	
1	CIA/ANAD IA/LUTE OAI/	Quercus bicolor	60'	*tolerant to salt, drought, and heat.	*widely adaptable	*6	*wildlife food *shade
	SWAMP WHITE OAK	Quercus bicoloi	60	*peeling bark reveals an orange inner bark. *leaves turn golden or orange-brown during the fall.	*well drained	*full sun	*timber
				*has a fast growth rate			
-	SYCAMORE	Platanus occidentalis	100'	*highly deer resistant *yellow in fall	*widely adaptable	*full sun	*shade
Mile &				*tolerates extreme weather/air pollution/salt	*poorly drained	*part shade	*wildlife food
0-	WHITE FLOWERING			*showy white flowers in spring,	*widely adaptable		
	DOGWOOD	Cornus florida	25'	*rich green foliage in summer & bright red leaves in fall	*well drained	*full sun	*wildlife food
. C. A.	DOGWOOD			*red berries are relished by birds & animals all winter.	well dialiled		
			Г	DECIDUOUS EVERGREEN			
PICTURE	SPECIES	SCIENTIFIC NAME	MATURE HEIGHT	DESCRIPTION	SOILS	LIGHT	USES
A Market	AMERICAN LARCH	Lariy laricina	901	*blue-green needles turn an intense golden yellow in the fall	*widely adaptable	*f,.ll	*wildlife food
*	AIVIERICAIN LAKCH	Larix laricina	80'	*fast growing & very hardy	*poorly drained	*full sun	*shade
	1	L	I .	*flourishes in wetlands and bogs	1		*timber
				EVERGREENS			
PICTURE	SPECIES	SCIENTIFIC NAME	MATURE HEIGHT	DESCRIPTION	SOILS	LIGHT	USES
	3. 20.23	JULIAN IC ITAIN	SILL HEIGHT	*branches are popular in holiday wreaths	30.23		*Christmas tree
	BALSAM FIR	Abies balsamea	75'	*dark green needles	*well drained	*full sun	*windbreak
				*has a spicy fragrance		*part shade	*wildlife cover
1411	001.0040.0			*stiff, silvery blue-green needles		** 11	*Christmas tree
	COLORADO	Picea pungens	75'	*wildlife cover	*average	*full sun	*windbreak
Res	BLUE SPRUCE			*good for windbreak		*part shade	*wildlife cover
* Allers	EASTERN			*ornamental		*full sun	*windbreak
LE LE	WHITE CEDAR	Thuja occidentalis	40'	*provides wildlife shelter	*widely adaptable	*part shade	*wildlife cover
7	WITH CEDAN			*good for screens		part snaac	*wildlife food
	EASTERN	2:	0.01	*fast growing *long soft needles	*	*full sun	*windbreak
A Marie	WHITE PINE	Pinus strobus	80'	*good for windbreaks and screens	*widely adaptable	*part shade	*wildlife cover
- F				*attractive ornamental tree		•	*wildlife food
MAKE.	FRASER FIR	Abies fraseri	50'	*most popular christmas tree *has a very pleasant odor	*well drained	*full sun	*christmas tree
-	FRASER FIR	Ables fluseri	30	*does well at retaining needles	well drained	*part shade	*wildlife food *wildlife cover
- 4				*drooping branches *good for windbreaks			*windbreak
- N/F	NORWAY SPRUCE	Picea abies	80'	*cover & food for numerous birds & animals	*average	*full sun	*Christmas tree
A STATE OF THE PARTY OF THE PAR				*resistant to walnut toxicity		*part shade	*wildlife cover & for
	-					<u>'</u>	
				FLOWERS			
PICTURE	SPECIES	SCIENTIFIC NAME	MATURE HEIGHT	DESCRIPTION	SOILS	LIGHT	USES
0 3		Rudbeckia fulgida		*brown cone and yellow petals			*border
· AN	BLACK EYED SUSAN	'Goldsturm'	24"	*blooms July - October	*well drained	*full sun	*fresh flowers
		Goldstariii		*long bloom and low maintenance			Tresti flowers
				*blooms July - September			*border
	LAVENDER	Lavandula angustifolia	18"	*attracts bees and butterflies *flowers retain their floral aroma for months when dries	*widely adaptable	*full sun	*fresh flowers
A Management			i .				
All Inches	LILV 'MATRIY'	Lilium	20"	*fiery red with deep orange center	*woll drained	*full sun	*border
	LILY 'MATRIX'	<i>Lilium</i> 'Matrix'	20"	*fiery red with deep orange center *blooms during the summer	*well drained	*full sun *part shade	
	LILY 'MATRIX'		20"	*fiery red with deep orange center *blooms during the summer *will multiply in size over the years	*well drained		*border
	LILY 'MATRIX'		20"	*fiery red with deep orange center *blooms during the summer	*well drained		*border
PICTURE	LILY 'MATRIX' SPECIES		20"	*fiery red with deep orange center *blooms during the summer *will multiply in size over the years	*well drained		*border
PICTURE	SPECIES	'Matrix' SCIENTIFIC NAME		*fiery red with deep orange center *blooms during the summer *will multiply in size over the years FRUITS	SOILS	*part shade	*border *fresh flowers
PICTURE	SPECIES STRAWBERRIES	'Matrix' SCIENTIFIC NAME Fragaria x ananassa		*fiery red with deep orange center *blooms during the summer *will multiply in size over the years FRUITS DESCRIPTION	SOILS *well drained	*part shade	*border *fresh flowers USES *human food
PICTURE	SPECIES	'Matrix' SCIENTIFIC NAME	MATURE HEIGHT	*fiery red with deep orange center *blooms during the summer *will multiply in size over the years FRUITS DESCRIPTION *has high yield of large, juicy fruit	SOILS	*part shade	*border *fresh flowers
PICTURE	SPECIES STRAWBERRIES 'ALL STAR'	'Matrix' SCIENTIFIC NAME Fragaria x ananassa 'Allstar'	MATURE HEIGHT 8-12"	*fiery red with deep orange center *blooms during the summer *will multiply in size over the years FRUITS DESCRIPTION *has high yield of large, juicy fruit *white flowers with yellow centers appear before fruiting	*well drained	*part shade LIGHT *full sun	*border *fresh flowers USES *human food *wildlife food
PICTURE	SPECIES STRAWBERRIES	'Matrix' SCIENTIFIC NAME Fragaria x ananassa 'Allstar' Malus domestica	MATURE HEIGHT	*fiery red with deep orange center *blooms during the summer *will multiply in size over the years FRUITS DESCRIPTION *has high yield of large, juicy fruit *white flowers with yellow centers appear before fruiting *self-pollinating *semi-dwarf bare root stock * harvest early September *pollination requires 2 apples trees	SOILS *well drained	*part shade	*border *fresh flowers USES *human food *wildlife food *human food
PICTURE	SPECIES STRAWBERRIES 'ALL STAR'	'Matrix' SCIENTIFIC NAME Fragaria x ananassa 'Allstar'	MATURE HEIGHT 8-12"	*fiery red with deep orange center *blooms during the summer *will multiply in size over the years FRUITS DESCRIPTION *has high yield of large, juicy fruit *white flowers with yellow centers appear before fruiting *self-pollinating *semi-dwarf bare root stock * harvest early September *pollination requires 2 apples trees *orange red in color with a sweet-tart, crisp juicy flavor	*well drained	*part shade LIGHT *full sun	*border *fresh flowers USES *human food *wildlife food
PICTURE	SPECIES STRAWBERRIES 'ALL STAR' HONEYCRISP APPLE	'Matrix' SCIENTIFIC NAME Fragaria x ananassa 'Allstar' Malus domestica	MATURE HEIGHT 8-12" 15'	*fiery red with deep orange center *blooms during the summer *will multiply in size over the years FRUITS DESCRIPTION *has high yield of large, juicy fruit *white flowers with yellow centers appear before fruiting	*well drained *average *well drained	*part shade LIGHT *full sun *full sun	*border *fresh flowers USES *human food *wildlife food *human food
PICTURE	SPECIES STRAWBERRIES 'ALL STAR'	'Matrix' SCIENTIFIC NAME Fragaria x ananassa 'Allstar' Malus domestica 'Honeycrisp'	MATURE HEIGHT 8-12"	*fiery red with deep orange center *blooms during the summer *will multiply in size over the years FRUITS DESCRIPTION *has high yield of large, juicy fruit *white flowers with yellow centers appear before fruiting *self-pollinating *semi-dwarf bare root stock * harvest early September *pollination requires 2 apples trees *orange red in color with a sweet-tart, crisp juicy flavor *fast growing, cold & drought tolerant *mildly tart taste - great for apple sauce, making cider, & baking	*well drained	*part shade LIGHT *full sun	*border *fresh flowers USES *human food *wildlife food *human food *wildlife food
PICTURE	SPECIES STRAWBERRIES 'ALL STAR' HONEYCRISP APPLE	'Matrix' SCIENTIFIC NAME Fragaria x ananassa 'Allstar' Malus domestica 'Honeycrisp' Malus domestica	MATURE HEIGHT 8-12" 15'	*fiery red with deep orange center *blooms during the summer *will multiply in size over the years FRUITS DESCRIPTION *has high yield of large, juicy fruit *white flowers with yellow centers appear before fruiting *self-pollinating *semi-dwarf bare root stock * harvest early September *pollination requires 2 apples trees *orange red in color with a sweet-tart, crisp juicy flavor *fast growing, cold & drought tolerant *mildly tart taste - great for apple sauce, making cider, & baking *ripens from July to August	*well drained *average *well drained	*part shade LIGHT *full sun *full sun	*border *fresh flowers USES *human food *wildlife food *human food *wildlife food *human food
PICTURE	SPECIES STRAWBERRIES 'ALL STAR' HONEYCRISP APPLE MCINTOSH APPLE	'Matrix' SCIENTIFIC NAME Fragaria x ananassa 'Allstar' Malus domestica 'Honeycrisp' Malus domestica	8-12" 15'	*fiery red with deep orange center *blooms during the summer *will multiply in size over the years FRUITS DESCRIPTION *has high yield of large, juicy fruit *white flowers with yellow centers appear before fruiting *self-pollinating *semi-dwarf bare root stock * harvest early September *pollination requires 2 apples trees *orange red in color with a sweet-tart, crisp juicy flavor *fast growing, cold & drought tolerant *mildly tart taste - great for apple sauce, making cider, & baking *ripens from July to August *self-pollinating *has white flowers in spring	*well drained *average *well drained *well drained	*part shade LIGHT *full sun *full sun	*border *fresh flowers USES *human food *wildlife food *human food *wildlife food *human food
PICTURE	SPECIES STRAWBERRIES 'ALL STAR' HONEYCRISP APPLE	'Matrix' SCIENTIFIC NAME Fragaria x ananassa 'Allstar' Malus domestica 'Honeycrisp' Malus domestica 'Mcintosh'	MATURE HEIGHT 8-12" 15'	*fiery red with deep orange center *blooms during the summer *will multiply in size over the years FRUITS DESCRIPTION *has high yield of large, juicy fruit *white flowers with yellow centers appear before fruiting *self-pollinating *semi-dwarf bare root stock * harvest early September *pollination requires 2 apples trees *orange red in color with a sweet-tart, crisp juicy flavor *fast growing, cold & drought tolerant *mildly tart taste - great for apple sauce, making cider, & baking *ripens from July to August *self-pollinating *has white flowers in spring *cherries are heart shaped and deep red in color	*well drained *average *well drained	*part shade LIGHT *full sun *full sun	*border *fresh flowers USES *human food *wildlife food *human food *wildlife food *human food *wildlife food
PICTURE	SPECIES STRAWBERRIES 'ALL STAR' HONEYCRISP APPLE MCINTOSH APPLE	'Matrix' SCIENTIFIC NAME Fragaria x ananassa 'Allstar' Malus domestica 'Honeycrisp' Malus domestica 'Mcintosh' Prunus avium	8-12" 15'	*fiery red with deep orange center *blooms during the summer *will multiply in size over the years FRUITS DESCRIPTION *has high yield of large, juicy fruit *white flowers with yellow centers appear before fruiting *self-pollinating *semi-dwarf bare root stock * harvest early September *pollination requires 2 apples trees *orange red in color with a sweet-tart, crisp juicy flavor *fast growing, cold & drought tolerant *mildly tart taste - great for apple sauce, making cider, & baking *ripens from July to August *self-pollinating *has white flowers in spring *cherries are heart shaped and deep red in color *attracts birds	*well drained *average *well drained *well drained	*part shade LIGHT *full sun *full sun	*border *fresh flowers USES *human food *wildlife food *human food *wildlife food *human food *wildlife food *human food *wildlife food
PICTURE	SPECIES STRAWBERRIES 'ALL STAR' HONEYCRISP APPLE MCINTOSH APPLE	'Matrix' SCIENTIFIC NAME Fragaria x ananassa 'Allstar' Malus domestica 'Honeycrisp' Malus domestica 'Mcintosh' Prunus avium	8-12" 15'	*fiery red with deep orange center *blooms during the summer *will multiply in size over the years FRUITS DESCRIPTION *has high yield of large, juicy fruit *white flowers with yellow centers appear before fruiting *self-pollinating *semi-dwarf bare root stock * harvest early September *pollination requires 2 apples trees *orange red in color with a sweet-tart, crisp juicy flavor *fast growing, cold & drought tolerant *mildly tart taste - great for apple sauce, making cider, & baking *ripens from July to August *self-pollinating *has white flowers in spring *cherries are heart shaped and deep red in color *attracts birds	*well drained *average *well drained *well drained	*part shade LIGHT *full sun *full sun	*border *fresh flowers USES *human food *wildlife food *human food *wildlife food *human food *wildlife food *human food *wildlife food
