2019 Species Descriptions & Site Suitability

No.	Species	Mature Height	Description	Soils	Light	Uses
1	Chinese Chestnut <i>Castanea mollissima</i>	60'	Very striking tree, good street tree, very tolerant of soil conditions except for wetlands.	AS	FS, PS	S, HF, WF
2	Sugar Maple <i>Acer saccharum</i>	75'	Favorite street tree, nice shade tree, fairly fast growing, desirable firewood, valuable timber, grows on wide variety of soils, but prefers well drained soils.	WA	FS, PS	S, T, WF
3	Red Oak <i>Quercus rubra</i>	75'	Brilliant fall foliage, fast growing, food source for numerous birds and animals, valuable timber.	WD	FS, PS	WF, T
4	American Plum <i>Prunus americana</i>	20'	A small tree with profusion of small white flowers in Spring, abundant edible fruits late Summer, good for making jams, excellent wildlife food. Tolerates several days of flooding.	WA, SW	FS, PS	HF, WF, EC, WB
5	Tulip Poplar <i>Liriodendron tulipifera</i>	90'	Thrives on many soils, fast growing. Distinctive greenish yellow tulip shaped flowers in Spring. Large shade tree.	WA	FS, PS	T, S, WF
6	Emerald Arborvitae <i>Thuja occidentalis 'smaragd'</i>	12'	Bright green hue, very attractive as landscape accent, columnar shape.	TP	FS	H
7	Concolor Fir <i>Abies concolor</i>	50'	Good foliage color, good needle retention, pleasing shape & aroma.	MS	FS, PS	WF, WC, CT
8	Blue Spruce <i>Picea pungens var. glauca</i>	75'	Stiff, silvery-blue green needles prickly to touch, "King of the Ornamentals", can form dense colorful screens.	AS	FS, PS	WC, WB, CT
9	Balsam Fir <i>Abies balsamea</i>	75'	Narrow pyramidal form, short soft needles, great fragrance, excellent Christmas tree, needs very little shearing.	WD	FS	CT, WF, WC
10	Black Hills Spruce <i>Picea glauca densata</i>	40'	Short stiff bluish needles, withstands wind, heat, cold and drought. Excellent dense evergreen screen. Makes excellent farmstead windbreaks.	WA	FS	CT, WB, WC, WB
11	Norway Spruce <i>Picea abies</i>	80'	Graceful very attractive, drooping branches. Resistant to walnut toxicity.	AS	FS, PS	CT, WB, WF, WC
12	White Cedar <i>Thuja occidentalis</i>	40'	Growth is pyramidal and well suited for windbreaks, good wetland plant.	AS, SW	FS, PS	WC, WF, H
13	White Pine <i>Pinus strobus</i>	80'	Soft long needles, frequently used for windbreaks.	WA	FS, PS	WC, WF, WB
14	Black Eyed Susan <i>Rudbeckia</i>	2'	Long bloom, low maintenance, and easy to grow. Blooms are gold. Bloom time: July - October.	WA	FS, PS	WF, B
15	Purple Coneflower <i>'Echinacea purpurea'</i>	24"	Tolerates heat, drought and wind. Coarse, dark leaves are attractive before flowering and the stiff habit make an attractive addition to either a formal or a cottage garden. Blooms are light purple. Bloom time: July - September.	WD	FS, PS	WF
16	Coral Bells <i>'Heuchera'</i>	22"	Low, non-spreading mounds of foliage topped by clusters of small, bell-shaped flowers. Blooms are deep purple. Bloom time: July - August	WD	FS, PS	GC
17	Bleeding Heart <i>Dicentra</i>	24"	Graceful summer flowering plant with sprays of heart shaped flowers dangling from fern-like leaves. The mounding plants are easy to grow. Blooms light pink. Bloom time: May - June.	WD	S	GC
18	Shasta Daisy <i>Leucanthemum superbum</i>	36"	Large, single white flower with yellow center on green tooth-edged foliage. Dependable, showy flowers for borders. Blooms are white. Bloom time: June-September.	WD	FS, PS	GC
19	Phlox Orange Perfection <i>Phlox paniculata</i>	32"	Fragrant flowers in large, dense pyramidal cluster. Easy to grow and look spectacular in borders or mass plantings.	WD	FS, PS	WF

No.	Species	Mature Height	Description	Soils	Light	Uses
20	Honeycrisp Apple Tree <i>Malus domestica</i>	8'	Semi-dwarf, early Spring blooms of white to blush pink blossoms, sweet-tart, crisp, juicy flavor, delicious fruit. It's best to plant additional apple trees nearby to promote pollination! Harvest early September. Easy to grow!	WD	FS	HF, WF
21	Blackberry Darrow <i>Rubus fruticosus</i>	5'	Large berries firm & juicy, cold hardy. Super vigorous and self-pollinating. Flowers attract butterflies.	WD	FS	HF, WF
22	Blueberry Jersey <i>Vaccinium corymbosum</i>	7'	Large berries firm & juicy, high yield, cold hardy, self-pollinating. Loved by birds and other wildlife. Flowers provide nectar for native bees, butterflies and other pollinators.	WD	FS	HF, WF
23	Reliance Peach Tree <i>Prunus persica</i>	10'	Semi -dwarf, fruit ripens July, size medium to large, produces heavy crop, self-pollinating.	WD	FS	HF, WF
24	Bartlett Pear Tree <i>Pyrus communis</i>	8'	Semi-dwarf, fast growing, adapts well to urban pollution, A large, heavy-bearing pear variety. Fruit ripens in late August. Other trees are not needed for cross pollination.	WA	FS	HF, WF
25	Strawberries Honeoye <i>Fragaria x ananassa honeoye</i>		Tastiest strawberries ever! Sweet as honey, June bearing variety, good for freezing, with a 2 week harvest period.	WD	FS	HF, GC
26	Highbush Cranberry <i>Viburnum trilobum</i>	15'	Four inch snow white lace cap flowers, followed by bright red translucent berries, round shrub.	WD	FS, PS	WF
27	Common Lilac <i>Syringa vulgaris</i>	15'	Masses of very aromatic lavender flowers late Spring, butterfly and hummingbird attraction, wonderful flowering screen, resistant to walnut toxicity.	WA	FS	WC, WF, WB
A	Arbor Guard	Protects tree trunks from weed trimmers, mower decks and mice. 25% recycled polyethylene wrap-around guard expands as the tree grows. Holes in guard are the right size to discourage rodents, yet allow the bark to breathe so rot does not develop.				
B	Bat Box	One brown bat can eat 3,000 to 7,000 mosquitoes a night! Many people think that birds such as the purple martin are the best natural defense against those tiny pests, but they are not! Bats feed when mosquitoes are most active at night. One bat box will hold up to 60 brown bats.				
C	Bluebird Box	Bluebird nesting timetable is from March 15 - June 20. The more nesting boxes you put up the more likely you are to get your NEW YORK STATE BIRD, the bluebird, in your yard.				
D	Fertilizer Tablets	Benefits: promotes vigorous growth, easy to use. Just put one tablet in planting hole, put some soil over it and then plant the tree or shrub. Time released slowly over a two year period.				
E	Organic Tree Spikes	Most effective way to deliver organic fertilizer to your trees. These spikes are placed in the soil, where microbes will break them down for fast absorption by feeder roots.				
F	Marking Flags	Mark your planting so you don't mow it over! It also helps to remind you where you planted, so that you can keep weeds from taking over the young tree or shrub.				
G	Rain Gauge	Tru-Check. Wherever accurate knowledge of rainfall is important. Great gift for farmers, homeowners, greens keepers, orchardists, hobbyists, contractors and conservationists.
